#### WRITING

- (1)
- The  $(d, k)$ -hypersimplex is the polytope  $\Delta(d, k) = \square_0^d \cap H_k$ , where  $\square_0^d$  is the cube  $\square_0^d = \{x \in \mathbb{R}^d : 0 \leq x_i \leq 1 \text{ for all } i \in [d]\}$ , and  $H_k = \{x \in \mathbb{R}^d : \sum_{i=1}^d x_i = k\}$ .
  - $\Delta'(d, k) = \square_0^d \cap S_k$ , where  $S_k$  is the slab  $\{x \in \mathbb{R}^d : k-1 \leq \sum_{i=1}^d x_i \leq k\}$ .
  - Analogously, define  $\Sigma(d, k) = \Delta^d \cap H_k$ , where  $\Delta^d = \text{conv}\{0, e_1, \dots, e_1 + \dots + e_d\}$ , and  $\Sigma'(d, k) = \Delta^d \cap S_k$ .
  - A polytope  $P$  is  $\ell$ -simplicial if all  $\ell$ -dimensional faces of  $P$  are simplices.
  - $P$  is  $\ell$ -simple if all  $\ell$ -dimensional faces of the polar polytope  $P^\Delta$  are simplices.
- (a) “All faces of hypersimplices are hypersimplices”. True or false?
- (b) “All faces of a  $\Sigma(d, k)$  are of the form  $\Sigma(d', k')$ ”. True or false?
- (c) Calculate  $f_0$  and  $f_{d-1}$  for  $\Delta(d, k)$ ,  $\Delta'(d, k)$ ,  $\Sigma(d, k)$  and  $\Sigma'(d, k)$ .
- (d) Is there any relationship between  $\Delta(d, k)$  and  $\Delta'(d', k')$ ?
- (e) Is there any relationship between  $\Sigma(d, k)$  and  $\Sigma'(d', k')$ ?
- (f) For each triple  $(k, \ell, d)$  with  $0 \leq k, \ell \leq d$ , decide the truth of the following statements, where  $P$  is, in turn,  $\Delta(d, k)$ ,  $\Delta'(d, k)$ ,  $\Sigma(d, k)$  and  $\Sigma'(d, k)$ :
- (i)  $P$  is  $\ell$ -simplicial; (ii)  $P$  is  $\ell$ -simple; (iii)  $P$  is  $\ell$ -neighborly.
- (2) Let  $R$  be an integral rectangle whose edges are parallel to the coordinate axes in  $\mathbb{R}^2$ , and let  $T$  be a rectangular triangle two of whose edges are parallel to the coordinate axes. Show that Pick’s Theorem holds for  $R$  and  $T$ .

#### TURNING IN YOUR WORK

Put your answers into a .pdf file. To turn it in, use `gpg` and the public key `julian.gpg.pub` in the `github` repository to create an encrypted copy that is only readable by me. Then commit and push this encrypted file to the repository.
